

Autonomous Multi-Agent Infrastructure

Powering high-value enterprise orchestration across Real Estate, EdTech, Sovereign Finance, and Generative Media.

[Anchor: Ptah-Realty](#)

[Seed Round Profile](#)

Enterprise Bottlenecks Across Legacy Sectors

Real Estate Liquidity

Manual underwriting delays transactions.

Sovereign Compliance

High regulatory latency in cross-border clearing.

Static Education & Media

Rigid learning models lacking real-time adaptation.

Autonomous Multi-Agent Architecture

An interconnected network of 23 domain-specialized systems powered by a unified compute & intelligence foundation.

- ✓ **Zero-Latency Coordination:** Inter-agent orchestration across sectors.
- ✓ **Shared Core Runtime:** Central gateway, auth, and monitoring.
- ✓ **Accelerated Inference:** GPU-powered decision engines.

Estate Core Statistics

23

Sibling Systems

18

Domain Sectors

Production-ready monorepo with cross-system validation.

Ptah-Realty Architecture

Automated Valuation

Instant market yield and property assessment.

Deal Execution

FastAPI & MongoDB intelligence workflows.

Cross-Border Rails

AWS Bedrock integration for multi-region deals.

KEV Immersive Platform

WebXR Campus & 158 Role Agents

Interactive 3D learning across 185+ subjects through 13 explorable worlds, powered by AWS Bedrock and Auth0.

Global Reach: 198-country home language routing with 6 UI locales.

 **3D Environments:** Anatomy, orbital mechanics, historic worlds

 **Console Split:** Real-time teacher & student coordination

 **Testing Suite:** 207-test pytest coverage for continuous verification

PRIV Autonomous Financial Intelligence

Autonomous Risk

Multi-agent trading and governance controls.

PyTorch / CUDA

Neuromorphic & quantum-inspired optimizers.

Sans Pay (SMPP)

Low-latency cross-border payment settlement.

CrazyJam AI Music Composition

Hard GPU Acceleration for Generative Audio Production

Combines AWS Bedrock composition planning with MusicGen-large on AWS SageMaker async endpoints (NVIDIA A10G GPUs).

NVIDIA Stack Details

- PyTorch
- CUDA Toolkit
- cuDNN
- TensorRT (Planned)

Shared Compute & Acceleration Layer

Shared Resources

Unified gateway, central auth, monitoring, and Redis caching.

AWS Bedrock Layer

Claude-family orchestration for multi-agent logic.

NVIDIA Acceleration

A10G GPU inference + PyTorch CUDA offload layers.

TARGET MARKET

Cross-Industry TAM Expansion

\$4.2T

Global PropTech & Commercial Real Estate

\$300B+

Automated Fintech & EdTech Markets

Multi-Tier Revenue Architecture

Node Licensing

Enterprise SaaS subscriptions for specialized sector agents (Ptah, KEV).

Transaction Fees

Settlement volume margin via Sans Pay (SMPP) and deal execution.

API Compute Usage

Metered GPU generative inference for CrazyJam & custom models.

Seed Round: \$1M - \$5M

18-Month Deployment Plan

Scaling primary enterprise pipelines, expanding compute infrastructure, and driving customer acquisition across anchor platforms.

40% Ptah-Realty Expansion: Broker & developer pipeline

30% Compute & GPU Cluster: SageMaker / NVIDIA clusters

20% Compliance & Licensing: Legal & clearing rails

10% Operations: Key technical hires

INCEPTION CAPITAL CONNECT

Sans Mercantile

Building the next generation of autonomous enterprise agent networks.
